SECOND CIRCULAR Scientific Conference:

Glaciations and interglacials in Poland - current status and perspectives of research

dedicated to Prof. Leszek Lindner on the occasion of his 85th birthday and 60th anniversary of his scientific work

About the Conference

The conference is organized by the Chair of Climate Geology of the Faculty of Geology, University of Warsaw, on 16-18 June 2023 at the European Centre for Geological Education (ECEG) in Chęciny.

The conference is focused on results of the recent research of the Quaternary in Poland and Central Europe, as well as on a creative discussion of the current state and challenges of the Quaternary stratigraphy. The conference will provide an opportunity to deepen mutual contacts between the scientific centres involved in the Quaternary research and will be an excellent opportunity to honour Professor Leszek Lindner, his many years of scientific activity and 85th Anniversary.

Topics

The issues of the conference can be summarized in the following thematic groups:

- Stratigraphy of the Quaternary - current status
- Prospects for the development of research on Quaternary climatostratigraphy
- Palaeoenvironment of the interglacials
- Quaternary fluvial, aeolian and glacial environments
- Significance of long lake profiles in the paleoclimate studies
- Dating of mineral sediments
- Digital Elevation Models in geomorphological studies
- and others

The conference will comprise oral presentations (20 minutes), poster session, geological excursion and other social activities.

Detailed information is available at: <http://geo.uw.edu.pl/zlodowacenia2023>.

Please distribute this circular in your community.
